IMH Teams of NH are supported by the Pre-School Technical Assistance Network (PTAN/SERESC) with funding provided by the Children's Care Management Collaborative. Additional funding provided by the NH Association for Infant Mental Health

Enhancing the social & emotional development of young children & their families

Regional teams taking action across the state

Families & providers working together

Providing education, support & resources to our community

Collaborating to better support young children & their families

Infant Mental Health Teams of New Hampshire

Purpose:

Although each team has their unique vision/mission statement, the purpose of creating such teams is:

To build community awareness of the critical importance of healthy social & emotional development of young children, pre-natal to 6 years old, & collaborate to develop a system to meet the needs of all children & families.

Each team is charged with:

- Identifying community needs,
- Creating action plans to address the needs, and
- Evaluating the success of their action plans
